Bnh - Discussed U.S. Pat. 5,802,143 (Borchering et al) cited on the Butler Patent (6,201,853) - Borchering reads on independent claims 1, 10, 29 and 44. - Claims 19 and 24 are in condition for allowance due to "random selection" used for connecting the predetermined circuitry. - Suggested that Examiner call Attorney of record and prepare amendment for claims 1, 10, 29 and 44 to reflect the "random selection".	5/12/04	BWT
